EXPERIENCE

Erick's experience is comprised of multiple disciplines specializing in estimate writing and project management of commercial buildings, multi-family buildings and residential restoration. Furthermore, he specializes in taking a unique, mitigation-focused approach to large projects to help minimize exposure.

Erick has estimated, performed mitigation/remediation and managed building restoration for large loss catastrophes throughout the Upper Midwest including memory care facilities, public schools, government buildings, multifamily buildings and residential properties impacted by fire, water, storm damage, and mold.

FEATURED PROJECTS

- **Lakeville, Minnesota**
Mitigation and Restoration of a Memory Care Unit of an assisted living facility that impacted dozens of residents by a flood event during the Polar Vortex event in February of 2019.
- **St. Paul, Minnesota**
Scope and management of construction services for a flood event of a 45,000 square foot facility for the Department of Human Services.
- **St. Paul, Minnesota**
Scope and management of construction services for a flood event in a large multi-family facility resulting in roof replacement, removal, and replacement of main fire systems and major structural changes.
- **Apple Valley, Minnesota**
Mitigation oversight and construction services of a school impacted by Category 3 sewage backup.
