📍 Denver, CO

EXPERIENCE

With nearly 15 years' experience, Jared's work in the construction industry began as a project engineer in new construction, specializing in metal studs, drywall, and acoustical ceiling treatments. Having overseen coordination of workforce, materials, and delivery of equipment, he managed as many as 15+ jobs at a time. Results ensured that specifications were followed and that work progressed on schedule and within budget.

As VP of Consulting, Jared's vast understanding of building science and construction methodology add value while working alongside major general contractors to ensure that claims are handled timely, effectively, and ethically.

FEATURED PROJECTS

- **2023 Water, Colorado School of Mines**
Lead consultant on disaster due to a burst fire suppression line in a facilities engineering building. This added complex issues to manage. From determining adequate abatement and drying techniques to the relocation of student learning environments while in session, Jared's oversight with an expedited schedule prepared these buildings to resume student learning. The results were a reduction in the loss of matriculation for the school.
- **2021 Terrorist Bombing, Nashville, TN**
Lead Consultant managing emergency repair, building preservation, and reconstruction for historic properties, restaurants, bars, and lofts on Broadway valued at \$20M+. Liaison between both civic and private entities to ensure the greatest reduction of business interruption. Induced oversight to wrangle concerning issues including access, debris removal budgets/timelines, mitigation budgets/timelines, and project oversight.
- **2020 Tornado Donelson Christian Academy**
Lead Consultant over mitigation and reconstruction of school campus and facilities including stadium and safety lighting, parking areas, concession stands, and landscaping valued at \$15M+. Our team worked to reduce student learning interruption by maintaining strictly established construction budgets and implementing expedited repair methods while following state and local authorities' code for safety and environmental concerns to successfully open for the first day of school.
